RE: 306 Moyer Rd - Garage

Mr. and Mrs. Nelk,

This letter is to notify you that your permit application for the proposed shed at 306 Moyer Rd (TMP #15-011-085-001) in the CR-2 zoning district has been denied at this time. The permit application has been denied due to the following reason(s).

1. (§160-23.B(1), Hilltown ZO) The minimum required front yard setback is 45 ft; however, the proposed garage is setback 42 ft from the ~~side~~ front lot line. This will require a variance from the Zoning Hearing Board (ZHB.)
1. (§160-23.I(2)(a)[2], Hilltown ZO) Residential accessory structures are not permitted in the front yard. This will require a variance from the ZHB.

This may be appealed to the Hilltown Township Zoning Hearing Board (ZHB.) The link to the appeal form is located in the accompanied email.

If you should have any questions at this time, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Caitlin M. Mest".

Caitlin M. Mest, EIT, BCO, CFM, CZO  
Hilltown Township Zoning Officer  
BuildingAndZoning@hilltown.org

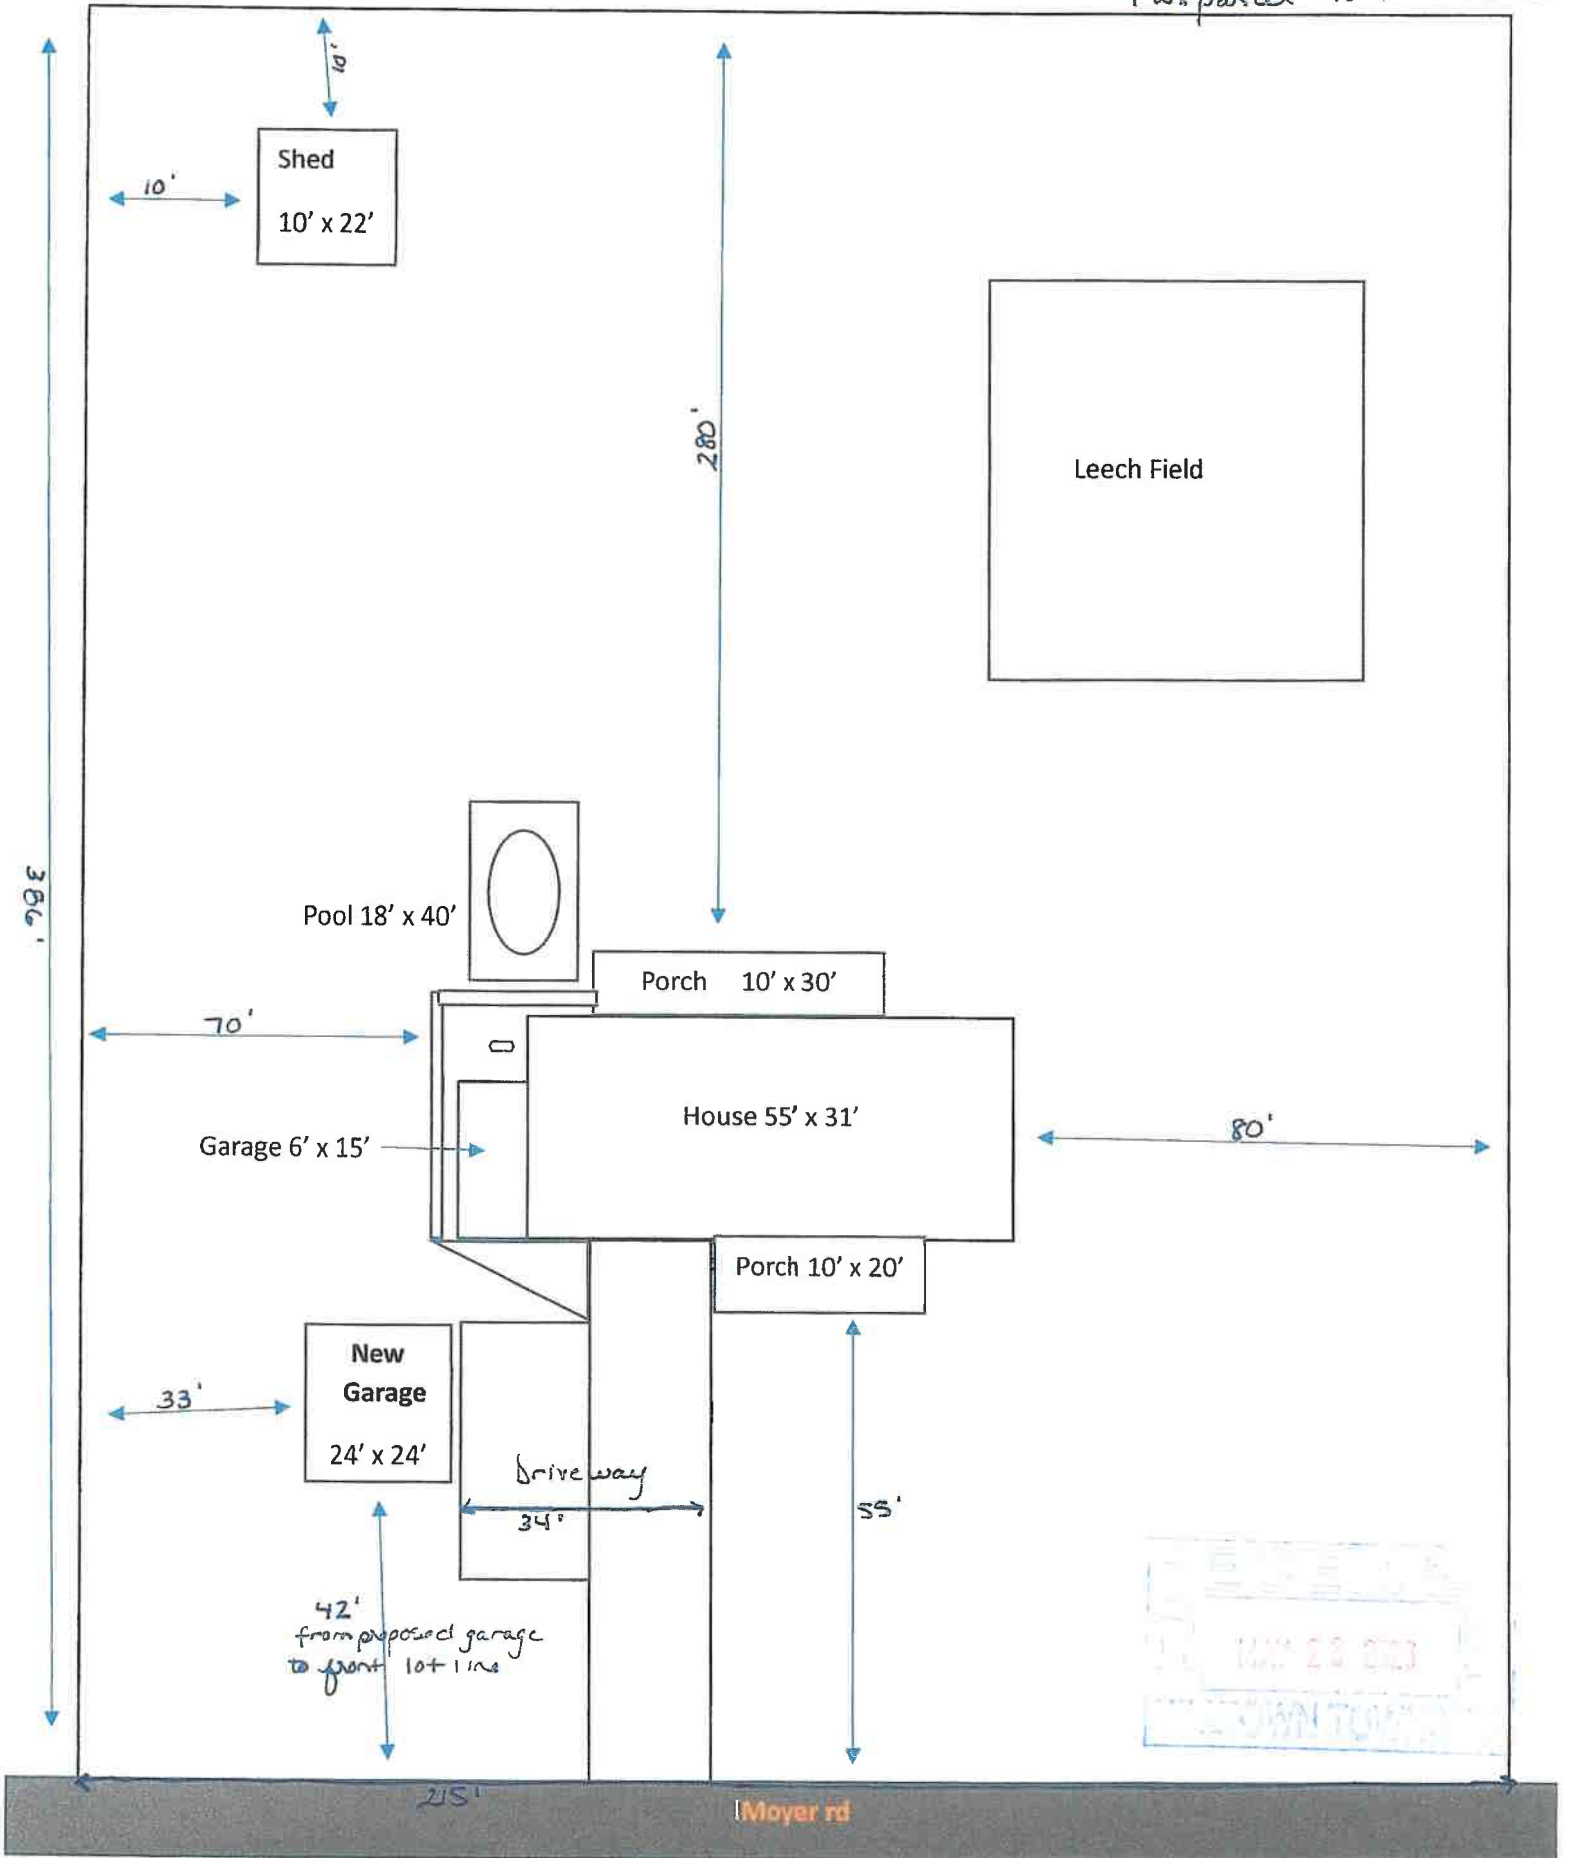

(160-23.B(1)

David and Jenni Nelk are requesting a variance to building a detached residential accessory (detached garage) 42 feet from the side front lot line instead of the 45 feet.

160-23.I(2) (a)[2] – David and Jenni Nelk are requesting a variance to allow a residential accessory (detached garage) in front side lot of property.

The accessory cannot be built in back of the property as this area gets very wet and would also create additional impervious surface as a new driveway would have to be extended to the back of the property. If we would have this building in our side lot in line with our home, it would also create additional impervious surface as the existing driveway would have be extending and also create more leveling and disturbance of earth on the side. We would like the detached garage to be in our side front long - this would align with our current driveway and create less disturbance of earth.

File No. 03-000

Dear Supervisors,

The following item is included under the Planning portion of your agenda:

**Jasinski Subdivision Sewage Facilities Planning Module**– The subject project (involving subdivision of the parent tract into 10 single family detached dwelling lots to be served by public sewer) previously received preliminary plan approval from the Township. One of the conditions of preliminary plan approval requires the applicant to obtain Sewage Facilities Planning approval from PADEP. A complete Sewage Facilities Planning Module has now been submitted to the Township for execution, which has been executed by Hilltown Township Water and Sewer Authority (HTWSA). A Resolution for Plan Revision for New Land Development (copy enclosed) must be adopted by the Board of Supervisors prior to transmittal of the Sewage Facilities Planning Module to PADEP. A motion approving the Resolution is requested so that the Sewage Facilities Planning Module may be submitted to PADEP.

There are no items included under the Engineering portion of your agenda.

If you have any questions, please do not hesitate to contact me.

Very truly yours,

**RE: Pennsylvania Department of Community and Economic Development's Technical Assistance to Sustain Municipal Services**

Dear Ms. Ferry:

The purpose of this Letter of Understanding ("LOU") is to establish the terms under which the Pennsylvania Department of Community and Economic Development ("DCED") agrees to, through its Governor's Center for Local Government Services, provide Hilltown Township ("Municipality") with technical assistance to sustain local municipal services.

**Background**

Pennsylvania municipalities serve as the primary providers of essential services that directly impact the safety, security, and overall quality of life of their residents. These services encompass critical operational domains, including public safety, public works, planning, and the administrative and financial oversight necessary to ensure effective municipal governance. Over time, the scope and complexity of delivering these services have grown significantly, presenting escalating challenges for local governments.

Concurrently, municipalities face increasing difficulties in recruiting and retaining qualified professionals capable of maintaining the high standards of service that taxpayers expect. As such, there is a pressing need for technical assistance focused on developing sustainable service delivery models. DCED has identified emerging best practices and innovative frameworks that warrant broad dissemination and education to enhance the efficient functioning of municipalities.

The Governor's Center for Local Government Services provides various forms of assistance to municipalities in Pennsylvania, including technical assistance for fundamental and short-term projects, training for local government officials, and resources for community planning.

## **Terms of the Understanding**

The following terms and conditions will govern the parties' understanding:

1. DCED Responsibilities
  - a. DCED shall provide a Peer-to-Peer Consultant, who is DCED staff, to Municipality. The Peer-to-Peer Consultant will provide the technical assistance as described in Exhibit A, "Project," attached to this LOU.
  - b. DCED shall have full control over the preparation, amendment, final production, and release of documents composed and produced while providing technical assistance to Municipality.
2. Municipality Responsibilities
  - a. At either party's request, Municipality, through its officials, employees, or agents, shall meet with the Peer-to-Peer Consultant and provide DCED with material, data, or information necessary for the successful completion of the project described in Exhibit A.
3. Municipality's elected board has approved the Project, and that approval is attached as Exhibit B. Documentation shall be in the form of meeting minutes or resolution.

Chalfont Quarry & Asphalt – Crushing Plant  
Naceville Materials, Joint Venture  
Hilltown Township, Bucks County

Dear Members of the Board:

Review of pending and ongoing project schedules and customer orders show the continued need to have occasional nighttime operating hours at the concrete batch plant and asphalt batch plant at the Chalfont Quarry & Asphalt facility. Based upon paving and concrete pouring requirements and/or job requirements which may be dictated by the Turnpike Commission, PennDOT and/or private customers it may be necessary to operate either plant during hours which are outside those outlined by the Agreement, i.e. 6:30 AM to 6:30 PM.

In addition, at this time, demand for materials is also requiring the need to operate the crushing plant outside of normal operating hours in order to meet supply requirements for asphalt, concrete and stone orders.

As a result, please accept this correspondence as formal request for approval for extended hours of operation for our concrete batch plant, asphalt batch plant and crushing plant at Chalfont Quarry & Asphalt, as follows:

- Approval to allow the concrete batch plant, asphalt batch plant and crushing plant at Chalfont Quarry & Asphalt to operate between the hours of 6:30 PM and 6:30 AM, Monday through Saturday, between July 1, 2026 and July 31, 2026. Please note that this request excludes Holidays.

During the month of May, 2026, the crushing plants (secondary and tertiary) did not operate outside of normal business hours. The asphalt plant operated on six (6) occasions outside of normal business hours. The concrete plant did not operate outside of normal business hours.

Members of the Board, if you have any questions regarding this request, please do not hesitate to contact me directly at (610) 222-3515 (office) or (484) 576-0210 (cellular). Thanks again for your continued assistance.
